Designated States (Regional): AT BE CH DE ES FR GB GR IT LI LU NL SE

Abstract (Basic): EP 225261 A

The compsns. contain, per 100pts. PVC, 0.001-2, partic. 0.005-1 pt. at least one polyorganosiloxane (I) block or statistical polymer of average formula (I) R = Me or Ph, at least 60 mol % being Me; R1 = linear or branched 1-18C alkylene hydrocarbon gp.; p = 1-30; q = 1-100. (I) has no. average mol. wt. 600-10,000. R1 = trimethylene or 2-methyltrimethylene, R = Me, p = 2-20 and q = 2-30. Compsn. is PVC plastisol or rigid or plasticised PVC.

USE/ADVANTAGE - (I) as defoaming agent and/or lubricatant for PVC plastisols or rigid or plasticised PVC (claimed). (I) does not exude and is not readily deposited in moulding machine, avoiding need for cleaning to prevent thermal decomposition of deposits; weldability of compsn. is unaffected.
